

Discount Percentages

Patients eligible for Financial Assistance will not be charged more than the Medicare Amounts Generally Billed (AGB) for emergency and other medically necessary care. Genesis Medical Center uses a look-back method to calculate the Medicare AGB by dividing the sum of paid Medicare claims by the total of gross charges submitted, in accordance with Internal Revenue Code Section 501(r). The Medicare AGB calculation determines the percentage for the partial charity discount. The partial charity percentages, effective July 1, 2024, for each of our facilities are listed below.

Genesis Medical Center offers uninsured patients an automatic discount. The uninsured discount percentages effective July 1, 2024, for each of our facilities are listed below except for Silvis which is effective August 1, 2024.

Health Ministry Name	Partial Charity IP %	Partial Charity OP %	Uninsured Discount %
