

# Laboratory Update

---

## **Weather Delays:**

Current weather conditions across several regions are causing delays in shipping specimens to our reference laboratory partners. As a result, some test turnaround times may be longer than usual. To minimize the impact on patient care, our team is stabilizing all specimens until they can be sent out without significant risk of loss. Any specimens that cannot be stabilized will be monitored closely, and we will notify you if a recollection becomes necessary.

We appreciate your understanding and patience as we work to maintain service continuity during these weather-related disruptions.
